CAREER OBJECTIVE

Full-stack developer focused on the MERN stack (MongoDB, Express.js, React.js, Node.js) with experience building responsive web applications. Also experienced in Flutter for mobile app development. Interested in contributing to projects that offer opportunities to learn and grow across both web and mobile technologies.

PROJECTS

Job Portal(MERN Stack)

Tech Stack: React.js, Node.js, Express.js, MongoDB.

- User authentication with JWT for secure login/signup.
- Job posting and management for recruiters.
- Job search with filters for job seekers.
- Profile management for job seekers.
- Admin panel for recruiters to manage job postings and applications.
- Real-time updates for job listings and applications.
- Responsive UI for seamless experience across devices.

E-Commerce Shopping App(Flutter)

Tech Stack: Flutter, Dart, Node.js, MongoDB.

- Developed a full-featured e-commerce platform with product browsing, search, and filtering functionalities.
- Built a shopping cart for adding and modifying items before checkout.
- Admin dashboard for managing products, categories, and orders.
- Implemented product detail pages with images, descriptions, and prices.
- Enabled category-based browsing to improve user navigation.
- Responsive design for smooth experience across mobile devices.
- Used RESTful APIs for efficient data management and interaction between frontend and backend
